*cn*Maestro™ end-to-end network lifecycle management

***cn*Maestro™** is a platform that is available in the cloud or deployment on premise, built from the ground up for secure, end-to-end network lifecycle management: inventory management, onboarding devices, daily operations and maintenance. By offering full visibiliy across the entirety of a network, cnMaestro greatly simplifies management of all network devices.

About Cambium Networks

Cambium Networks is a leading global provider of wireless broadband solutions that connect the unconnected dedicated to making it possible for operators to build sustainable businesses by connecting the under-connected and unconnected communities of the world. Our industry-leading portfolio of reliable, scalable and secure WiFi and wireless broadband point-to-point (PTP) and point-to-multipoint (PMP) platforms offer communications solutions that make it feasible and economical to unite the world and build a truly global society that leaves no one behind. At Cambium Networks, connecting people, places and things is our vision.
