

# IAK-0210B-02

## IVA PREMIUM HARD CASE ACCESSORY KIT

The iAK-0210B is an accessory kit accommodating two iVA analyzers and can be equipped with various adaptors and calibration standards to ensure efficiency and safety of your sweep instruments. The iAK Accessory kit completes your Kaelus sweep tester solution in any test environment from top of tower, base of tower, rooftop and in-building systems. The customized storage and carrying case is rugged enough for complete protection of the iVAs and components when transporting or on site testing. This twin case can accommodate 2x iVA, 1x OSL, 1x adaptor kit, 1x phase stable cable and battery bank.
