

About alliance

Alliance Corporation is a North America company, in business as a distributor and cable specialist since 1993. In 2018 we are celebrating 25 years in business. Our business was originally named Alliance Cables so our business has always had a large focus on cables. Over time our business has grown to encompass a wide variety of products for both wireless and wireline applications.

Cable termination

Alliance cuts, assembles & terminates all kinds of cables including power, coaxial and fibre optic. We have two specialised fibre clean rooms where the fibre optic cables are cut and connectorised.

Cable design

Alliance has an in-house design team that can design your custom cable & accessories. We have developed expertise many types of hybrid fiber and power cable designs with breakouts and with the addition of Alliance-designed enclosure/ junction / OVP boxes.
