

# MICROLAB 5G PASSIVES PROGRAM

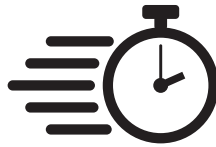

## COMPETITIVE PRICING PROGRAM

**Lower  
Prices**

**Increased  
Inventory**

**Reduced  
Lead Times**

### Discover our 5G Passives Program

We've lowered the price on select Microlab 5G passive products to help you offer more competitive DAS and passive solutions. We've also invested to increase our inventory levels and accelerate lead times so we can deliver the core 5G products you need to serve your customers, faster.

Our 5G Passives Program is a great opportunity to put the well-known quality of Microlab Ultra-Wideband & C-Band products to work for your business. The Program includes attenuators, multiband combiners, directional couplers, hybrid combiners, splitters, tappers and terminations. All products are already approved for use in carrier, OEM and third-party operator (3PO) networks so they will be very attractive to your customers.

### Lower prices and improved inventory increase your competitive advantage

We listened to your feedback! We have implemented this program so your teams can effectively compete and win projects across the USA. Let's work together on a stocking program that's just right for you.
