## **Directional Coupler, CC-PS-x-196FN series**

Public Safety, Low Loss Stripline Coupler 138 - 960 MHz, N-type Rev. B

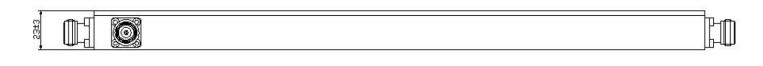

The CC-PS-x-196FN series of directional coupler is a tapered stripline design covering from 138 to 960 MHz. The units couple off a defined fraction of signal with high directivity and minimal loss. Availability in a wide range of coupling values makes this series useful in optimizing the signal distribution required in a Public Safety passive distribution network.

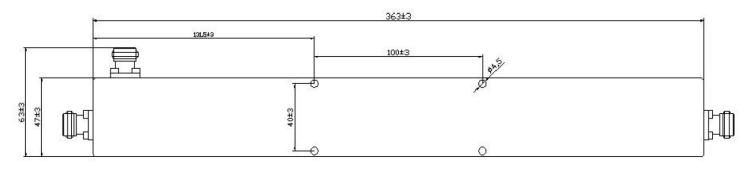

The wide Public Safety frequency range enables applications with multiband antennas, leaky cable systems, and wireless base stations. With minimal solder joints and a low loss dielectric, the dissipative loss has been minimized and reliability enhanced.
